

The attached Excel sheet describes the unit, instrumented, and integration tests developed for the application.

The sheet is structured as follows:

Tests are divided into blocks, by class, indicated in column A. This identifies which class the test belongs to, as well as whether they are unit tests, instrumented tests, or integration tests.

The “**Scenario**” column indicates with a letter N (nominal case) or E (error case) the test number.

The “**Tested method**” column indicates the method of the tested class during the scenario.

The “**Description**” column provides the test scenario.

The “**Set (given)**” column indicates the initial data provided during the test.

The “**Expected**” results column indicates the expected result for the test to be validated.

The “**Author**” column indicates the author of the test scenario.
